Why?

- LaTeX syntax is hard to remember

Why?

- LaTeX syntax is hard to remember
- Separate content from LaTeX syntax

Why?

- LaTeX syntax is hard to remember
- Separate content from LaTeX syntax
- Make it simple to create a starting point

Why?

- LaTeX syntax is hard to remember
- Separate content from LaTeX syntax
- Make it simple to create a starting point
- Add a default style to the presentation

Why?

- LaTeX syntax is hard to remember
- Separate content from LaTeX syntax
- Make it simple to create a starting point
- Add a default style to the presentation
- Add presentation-relevant Elements

Why?

- LaTeX syntax is hard to remember
- Separate content from LaTeX syntax
- Make it simple to create a starting point
- Add a default style to the presentation
- Add presentation-relevant Elements
 - TOC

Why?

- LaTeX syntax is hard to remember
- Separate content from LaTeX syntax
- Make it simple to create a starting point
- Add a default style to the presentation
- Add presentation-relevant Elements
 - TOC
 - Current/Total frame count at the bottom

Why?

- LaTeX syntax is hard to remember
- Separate content from LaTeX syntax
- Make it simple to create a starting point
- Add a default style to the presentation
- Add presentation-relevant Elements
 - TOC
 - Current/Total frame count at the bottom
- Easy to include highlighted source code

- Item
- Item
- Too many items on a slide are hard to remember!

Code: "foobar.py"

```
1  #!/usr/bin/env python
2  # encoding: utf-8
3
4  import sys
5  import os
6
7  def main():
8      pass
9
10 if __name__ == ' __main__ ' :
11     main()
```

Source Code

■ Syntax

Source Code

- Syntax

- `include foobar.py:`

Source Code

- Syntax
 - include foobar.py:
- Script creates markers for Idiopidae

Source Code

- Syntax
 - include foobar.py:
- Script creates markers for Idiopidae
 - zedshaw.com

Source Code

- Syntax
 - include foobar.py:
- Script creates markers for Idiopidae
 - zedshaw.com
- Idiopidae includes source code

Source Code

- Syntax
 - include foobar.py:
- Script creates markers for Idiopidae
 - zedshaw.com
- Idiopidae includes source code
- Uses **pygments** for highlighting

Images

■ Syntax

Images

- Syntax

- `image foobar.png:`

Images

- Syntax
 - image foobar.png:
- Uses "pgfimage" command

Images

- Syntax
 - `image foobar.png:`
- Uses "pgfimage" command
- Adds `[shrink]` option to resize image
